1. When one or more released value provisions are provided in this tariff, in the NMFC or in any other tariff or contract that would otherwise be applicable, for any specific commodity tendered for transportation the lowest such released value will apply in all cases.

C. Carriers maximum liability is limited per Item 784. If there exists in this tariff or any other governing tariff a conflict with the provisions of Item 784, then the Item producing the lowest liability for Carrier shall govern.

Item Title: LOADING BY CONSIGNOR - UNLOADING BY CONSIGNEE

Rates subject to provisions that consignor is to load and/or consignee is to unload the shipment, as the case may be, are subject to the following additional provisions:

1. At the time of shipment, the consignor must endorse on the Bill of Lading and Shipping Order the notation "Consignor load and count and/or consignee must unload" the shipment, as the case may be. (See Note 1).
2. The complete loading and/or unloading service, as the case may be, of the freight, including the count thereof must be performed by the shipper and/or consignee at his expense, without any assistance from the carrier. The carrier's employee and power unit is to be released while loading and/or unloading is performed. At carrier's option the carrier's employee and power unit may remain during loading or unloading but will render no assistance in loading or unloading or counting.
3. (A) The complete loading service includes the counting and loading of the freight into or on the carrier's vehicle and the proper stowing and/or stacking thereof to withstand the normal hazards of transportation. Any temporary blocking, flooring or lining, racks, standards, strips, stakes or similar bracing, dunnage or supports not constituting a shipping carrier, container or package, or a part of the vehicle, when required to protect and make shipments secure for transportation, must be furnished and installed by and at the expense of the consignor.
(B) The complete unloading service means that the consignee must count and remove the freight from the position in which it is transported in or on the carrier's vehicle.
4. On mixed shipments, when any portion of the freight is required to be loaded or unloaded by shipper and/or consignee, as the case may be, as a condition precedent to the application of the rate, the entire shipment must be loaded and/or unloaded and counted by the shipper or consignee otherwise the rate will not apply and rates otherwise published will be assessed.
5. In the event the shipment is stopped-off for partial loading or partial unloading the party or parties tendering or receiving any portion of the shipment will be subject to the requirements as to loading or unloading and counting, as the case may be.
6. If the consignor fails to comply with the requirements of paragraph 1 herein, or if for any reason the consignor or any party tendering any portion of the shipment refuses to perform the loading and counting, or the consignee, or any party receiving any portion of the shipment refuses to perform the unloading and counting, the rate will not apply and rates otherwise published will be assessed.

NOTE 1 - The requirements that notation must be placed on bill of lading and shipping order at time of shipments will not apply when entire shipment consists of freight secured to pallets, platforms or lift truck skids, or freight in any other authorized form of shipment, each unit weighing 500 pounds or more as tendered for shipment (loading required by consignor and unloading required by consignee per NMFC 100, Item 568).

Item Title: MAXIMUM WEIGHTS - PUP OR DOUBLES TRAILER

Rates or charges stated in units per pup or doubles trailer shall be subject to a maximum weight of 22,000 pounds or that maximum quantity of freight that can be legally loaded and transported in or on a pup or doubles trailer because of the weight limitations of state or other regulatory bodies, whichever is less.

The shipment would be rated:

First	22,000 @ pup rate	\$1151.13

Expiration Date:

Item Title: MINIMUM CHARGE - DENSITY

Except as otherwise provided, shipments meeting the conditions of this item shall be subject to a Minimum Charge, based upon a calculated weight and the applicable rate.

The calculated weight shall be determined by multiplying the cubic capacity of the shipment by six (6) pounds for each cubic foot or portion thereof.

The applicable rate shall be determined from the class tariff as defined in the payor's pricing provisions. If the shipment is subject to commodity rate provisions, the governing class tariff to be applied will be the current VITR 500 class tariff in effect at the time of the shipment. The Class 100 rate will apply, regardless of any established FAKs. The payor's full published discount percentage (excluding any FAK provisions), will apply. If the payor's has no published pricing, then a fifty (50%) percent discount will apply.

Conditions and Definitions:

1. Provisions of this item apply only in connection with shipments which weigh less than six (6) pounds per cubic foot (actual weight) and which require more than 650 cubic feet of space.
2. The cubic capacity of the shipment shall be determined by totaling the cubic feet of each packaged unit in the shipment, in accordance with NMFC 100 Series, Item 110, Section 8 (a) and (b), except as provided below.

A vertical and / or horizontal dimension of eight (8) feet shall be used to determine the cube of the individual shipping unit (s) when loading of other cargo is precluded because of:

- a) the nature of the article;
- b) the packaging or lack of packaging used;
- c) palletization in "pyramided", "rounded off", or "topped off" fashion, and/or
- d) specific instructions by the shipper in the form of a bill of lading notation.
- e) if shipping units are over 52 inches high and / or wide.

The cubic capacity will be determined by the carrier. The provisions of the National Motor Freight Classification, NMF100 Series, Items 595 and Item 171 will not apply in connection with the application of this item.

3. When this item has application, the carrier's freight bill will indicate both the actual weight and the calculated weight used to calculate the minimum charge.
4. The provisions of this item are not applicable in connection with shipments subject to:
 - a) "CAPACITY LOAD OR EXCLUSIVE USE OF VEHICLE" provisions in otherwise applicable tariff (s) or in Items 390 and 520 of this tariff;
 - b) rates stated in units per mile or per mile or per piece of line-haul equipment, e.g., rates in cents per mile, per "pup", per "doubles trailer", per "van", per "standard trailer" or per "vehicle";
 - c) "LINEAR FOOT MINIMUM CHARGE" provisions in otherwise applicable tariff(s).

5. Multiple shipments tendered the same day consigned to the same consignee will be considered as a single shipment and will be rated subject to the minimum charge published in this item.

VITR125-G**VITRAN EXPRESS****Effective Date: 04/03/06****ITEM 640****Expiration Date:****Issue Date: 04/03/06****Item Title: MIXED SHIPMENTS - LTL OR AQ
(Exception to NMFC Item 640, Section 2) (See Note 2)**

On a mixed less-than-truckload shipment or any quantity shipment consisting of two or more commodities subject to different rates, the charge for each commodity shall be at the respective less-than-truckload or any quantity rate applicable to the aggregate weight of the shipment or the actual weight of each commodity. Any deficit in weight will be charged at the rate applicable to the lowest rated commodity in the shipment.

Where articles in the shipment are subject to more than one minimum charge, the highest of such minimum charges shall apply.

When LTL or AQ rates or ratings contain a provision that a certain article or articles may not exceed a certain weight or percentage of weight and a shipment exceeds the amount authorized, such excess will be charged for as a separate shipment (See Note 1). When the articles subject to a weight limitation are differently rated, the lower rated articles may be used to make up the amount of weight allowed and the higher rated articles will be considered as excess. The excess weight may not be used to make up a minimum weight.

NOTE 1 - The rate to apply will be the rate applicable on the weight of the article or articles being charged for on the basis of the rate or rates considering such portion as a separate shipment for rating purposes subject to a minimum charge if applicable.

NOTE 2 - The provision of exception item 640 will not apply on mixed shipments of solutions or distilled water, per item 59380 and administration sets per item 59384 of the NMFC. When there are mixed shipments of the articles herein, the articles will be rated per Section 2 and 8 of NMFC 100 Item 640.

Item Title: MIXED VOLUME OR MIXED TRUCKLOAD SHIPMENTS

1. Unless otherwise provided in this tariff, when a number of different articles (for which volume or truckload ratings or rates are provided when in straight volume or truckload shipments) are shipped at one time by one consignor to one consignee, at one destination, on one Bill of Lading as a mixed truckload shipment, charges on the entire shipment will be assessed on the basis of the straight volume or truckload rate (not "Specific Mixture", "All Freight", "Freight all Kinds" or "All Commodity" rate) applicable to each article in the mixture and at the actual or authorized or estimated weight of each article in the mixture except as provided in NMFC 100 Items 640 or 310.

A. The minimum weight shall be the highest attaching to any article in the mixed shipment, and any deficit in the minimum weight shall be charged for on the basis of the rate applicable to the lowest rated commodity in the shipment.

2. Subject to Paragraph 1, when the aggregate charge upon the entire shipment is less on the basis of the volume or truckload rate and volume or truckload minimum weight (or actual or authorized estimated weight if in excess of the volume or truckload minimum weight), for one or more of the articles, and on the basis of less than volume or truckload rate or rates (See Note 1) on the actual or authorized weight of the other article or articles, the shipment will be charged accordingly.

3. Subject to Paragraph 1, when the aggregate charge upon the entire shipment is made lower by considering the articles as if they were divided into two or more separate volume or truckload shipments, the shipment will be charged accordingly.

4A. If a lower charge results under the application of this item than under the provisions for a specific truckload or volume mixture, such lower charge will apply.

4B. When applying provisions in connections with volume or truckload rates or classes which specify that any weight in excess of a certain weight or percentage of weight, will be rated at the otherwise applicable rate or rates, the excess will be charged for as a separate shipment (See Note 2). When the articles subject to a weight limitation are differently rated, the higher rated articles may be used to make up the weight allowed and the lower rated articles will be considered as excess. The excess weight may not be used to make up the volume or truckload minimum weight.

5. Where different truckload or volume rates and minimum weights are provided on the same article included in a mixed volume or mixed truckload shipment, the lowest charge that can be computed by the use of any such rate and its accompanying minimum weight for that article shall be used in the determination of the charges for the entire shipment.

6. The provisions of this item will not apply to articles, the transportation of which, at the same time in the same vehicle, is prohibited by federal, state or municipal regulations.

7. This item will not apply on articles subject to Any Quantity rates or ratings. Such articles will be rated as a separate shipment and the weight of such articles may not be used to make up the volume or truckload minimum weight.

B. Except as provided in paragraph A, articles of extraordinary value, as defined below, will be accepted for shipment or as premiums accompanying other articles, providing the shipper requests excess liability coverage as provided below (subject to Note 7)

1. Articles tendered with an invoice value exceeding \$10.00 per pound per package will be considered to be of extraordinary value. Such articles will not be accepted for transportation unless the shipper requests excess liability coverage. Articles inadvertently accepted with an invoice value exceeding \$10.00 per pound per package, but without excess coverage will be considered to have been released by the shipper at \$10.00 per pound per package. Item Title: SHIPMENTS OF EXTRAORDINARY VALUE

Shipments having an invoice value in excess of \$10.00 per pound per piece or \$100,000.00 per shipment, whichever is less, will be considered as being of extraordinary value.

Unless a value in excess of \$10.00 per pound per piece or \$100,000.00 per shipment is declared on the bill of lading by the shipper at the time of shipment, and excess liability coverage is requested, the liability of Vitran Express for loss or damage, will be limited to a maximum claim liability of \$10.00 per pound per piece or \$100,000.00 per shipment, whichever is less. See Item 784 for carriers liability on shipments which are subjected to an FAK (Freight All Kinds) rating. See Item 783 for Carriers liability on specific commodities identified as high risk due to susceptibility to theft or damage.

Liability will be established based on the weight of the article(s) lost or damaged, not on the basis of the weight of the entire shipment. In no case will Vitran Express liability exceed shippers actual loss irrespective of the amount of excess valuation coverage requested (See Note 5).

At the option of the shipper, the shipper may request that the shipment liability be increased to full invoice value, not to exceed \$650,000 per shipment. When excess or extraordinary value coverage is requested, the carrier will assess an additional charge of \$3.00 per \$100.00 of additional coverage requested in excess of the amount listed in paragraph 1 above, subject to a minimum charge of \$63.66 per shipment.

Shipper requesting \$10,000 additional excess coverage must enter, in the description field on the bill of lading as follows:

"\$10,000 excess liability coverage requested"

- or -

"Excess liability coverage requested: \$10,000."

A statement of value without an express request for excess liability coverage will not increase Vitran's liability, and charges for excess liability coverage will not be assessed.

This charge is in addition to any other freight charges accruing to the shipment, and are to be paid by the party responsible for the payment. The charge for excess value coverage is not subject to any discounts, which may apply to the shipment.

Item Title: SHIPMENTS OF EXTRAORDINARY VALUE (Concluded)

NOTE 1: Excess liability coverage is available only on single line traffic. On joint line traffic, the \$10.00 per pound per piece or \$100,000 per shipment liability limit will apply but excess coverage is not available. On shipments moving between the United States and Canada, the maximum liability will be \$5.00 per pound (in the currency of origin), based on the total weight of the shipment with no excess coverage available. If any such extraordinary value shipment is inadvertently taken by the carrier, carrier's liability for loss or damage will be limited to a maximum of \$5.00 per pound based on the total weight of the shipment.

NOTE 2: The provisions of this item do not apply to any article which is subject to an actual value or released value provision in the NMFC nor to any "used" item. Refer to Items 848 & 849 of the VITR 125-AC Rules of Transportation and Special Services Tariff for liability limits on these articles. Articles tendered with an invoice value stated on the bill of lading at time of shipment exceeding the actual or released value of the articles tendered as provided in the NMFC 100 Classification or re-issues thereof will not qualify for excess liability coverage.
