Shipping  
Management**

# Vitrac

## One time registration

Once you register, VITRAC remembers your login ID and password, enhancing speed, efficiency and ease of use.

## Tracking and tracing

Track a shipment by Pro Number, Pickup Date, Bill of Lading Number or Purchase Order Number.

## Document Viewing and Retrieval

Electronically view and obtain images of Proof of Delivery or Bill of Lading.

## Infomail

Receive emails regarding shipment status tailored to your specific needs. You can automatically be advised of any transit updates, delays and confirmation of deliveries.

## Shipment Management Report

Create your own customized report to meet your specific needs which help with traffic analysis.

## Web Scheduler

Manage your scheduled reports using the Web Scheduler. You can cancel reports, modify report parameters, run reports using saved parameters and view report history.

## VITRAC weblink

Allows you to verify shipment status directly from your own website with a link to VITRAC.

**Ask us how ?**

**In addition, our e-commerce solutions have expanded to include:**

## Electronic Billing

Receive customized statements and invoices with images of delivery receipt and/or Bill of Lading electronically.

## Electronic Data Interchange (EDI)

Whether its bill tendering, shipment status, invoicing or acknowledgment, our flexible capabilities allow you to receive electronic files either in industry standardized EDI formats or customized to meet your needs. Communication methods can also be tailored to facilitate your workflow. Send/Receive data via email, FTP (File Transfer Protocol) or VAN (Value Added Network).

## Flexible Transit Time Calculator

Allows you to calculate the transit time for shipments depending on the type of service.

## Online Pickup Request

Submits pickup request and print Bill of Lading (BOL) with shipping labels.

## Online Rate Calculator

Allows you to calculate rate and request Spot Quote anytime.
